

# LÜDECKE at the bauma 2016 and the new water program 2016/17

## Meet us: LÜDECKE at the bauma 2016

All branches of industry, all leading manufacturers, all important innovations:

We are pleased to welcome you to the bauma in Munich from the **11th to the 17th of April 2016**. Bauma is the heartbeat of our industry and the leading platform for experts who deal with construction and building-material machines, construction vehicles, construction equipment and mining machines.

Meet us at the largest trade fair in the world and convincingly see our high-quality product portfolio. In **Hall A5 – Stand 425** we introduce to you different coupling systems for the construction industry. We are especially exhibiting our special solutions for hose connections on special hoses as well as for high working pressure.

We are already looking forward to the many interesting and promising conversations with you.

For more information visit: [bauma/en](http://bauma/en) as well as [LÜDECKE on bauma](http://LÜDECKE.on.bauma).

## The new LÜDECKE water program 2016/17: Professional coupling systems, spray nozzles and wand nozzles for water supply

We have expanded our water portfolio specifically and offer now a comprehensive product program for commercial gardening and landscaping, agriculture, private gardening, for cleaning and supply at industrial workplaces and building industries as well as food industry and drinking water applications.

New in our program is the WaterProfi Quick Connect Coupling with high passage and made of stainless steel. Since this season you can use our high-quality wand nozzle for an easy and professional watering of big areas. Convince yourself of the complex dosing system by means of the patent protected sliding-valve technology. The water jet can be fine tuned and adjusted by an easy switching of the sleeve on handle. These technical details as well as the delightful surface material and the ergonomic design relieve the hand in case of constant use.

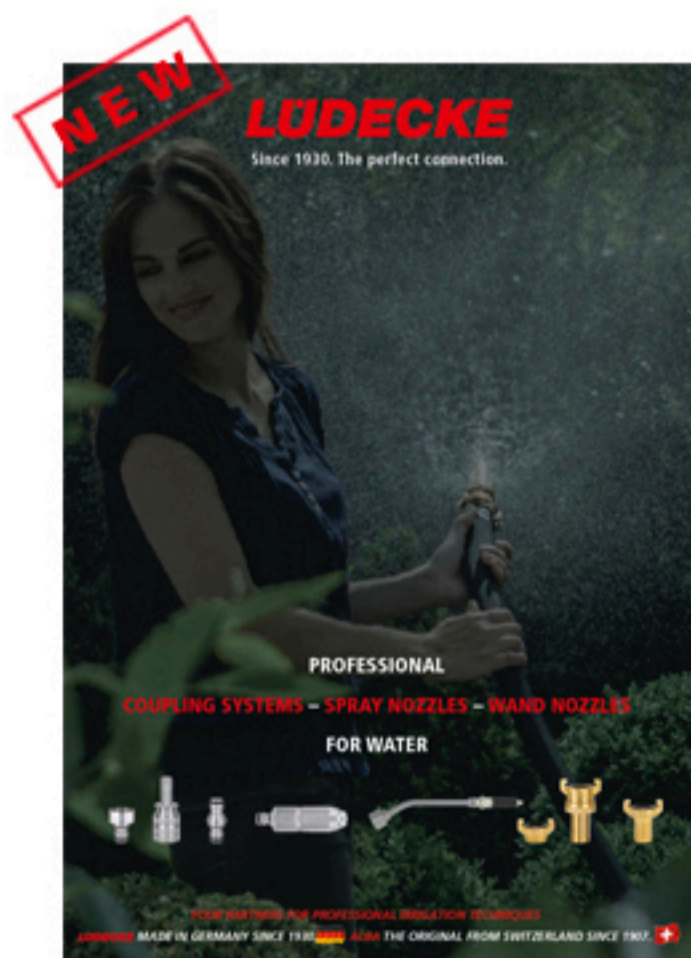

Our products are easy to handle, flexible usable, very robust and interchangeable with standard plug profile types and water claw couplings in the market. Behind our products there stands of course the proved **LÜDECKE** quality.

You can find all important information as well as the first-class ALBA KRAPP Hose Reels in our new water program (available in English in the next weeks).

Kind regards from Amberg

Your **LÜDECKE** - Team
